• Most valuable thing is being able to do the work while the teacher was doing it. It help my understanding in the programs I haven't used before. I also like sharing our projects with each other because it allowed me to be inspired by other people work. Also even if something was not the best he would encourage us. I also like how the in class work was related to what we had to do for homework. • Giving us until the end of the day after class to work on projects and giving us the opportunity to share our work with others without forcing us to show off was really nice. • I would say the google slides were the most valuable things he provided to us having tons of explaining and examples to help us students out. • The organization of the entire course was very useful in understanding what was expected and when it was due. Also, the very clear instructions and expectations for each assignment or project definitely aided in understanding what I needed to do. • Extremely descriptive teaching makes it easy to learn • I love the teaching style of the instructor. • Matt has given us great feedback and insights during reviews of our coursework in class. I have thoroughly enjoyed his lectures and have looked forward to going to this class. • Taught by example, used each program to show the steps to how to use it. The slides were always available before and after class, so if I missed something in class I could look at the slides to see how to do something. Gave us a chance in class to present our work and gave us feedback in class. • Always kept us engaged and was honestly very funny. • It was easy to follow the lessons and I enjoyed the creative freedom with the assignments. I also enjoyed that the grading was based on effort because I know I did always make the best things, but I worked hard on them. • Matt gave us a lot of freedom in the curse with our projects. This allowed me to pursue my interests and grow in the areas that I needed to. • In depth explanations how how to use certain software, requirements for projects and group discussions led by the instructor.

• The only thing I would improve would be just making it more exciting. Its late at night so I'm falling asleep. • Maybe be a little more strict on grading? While I always did my best, I always felt that I would get a good grade no matter what I turned in. • The only thing in my opinion that needed improvement was how he would go over some tools in the adobe apps. • maybe the number of slides in presentation • n/a • I wish there was a bit more of a focus on constructive feedback and criticism of work. Of course, this is an introductory class and so we are getting into some of these programs for the first time. But it would be helpful if there was a balance between compliment and criticism. • Some of the comments on the work submitted in canvas were short, mostly just "Like I said in class, great work!" but like that's not really an issue I just forget what professors say in class so I like to have more written feedback. • Slideshows are very long, but for the subjects I lacked experience in it was very helpful • Maybe the lesson moving a little bit faster. • Maybe more pointed feedback would be helpful. Additionally I think it could be interesting to have student work on their projects as a part of class time and have the professor help them when they need rather than spending the whole class on a tutorial.

- I appreciate how the presenting your work on the previous assignment at the beginning of class sessions felt open and inclusive. I did not feel nervous sharing my work to the rest of the class.
- I loved this course a lot and it has helped motivate me to work on some of my hobbies and passions outside of a class/work environment and I'm really thankful for that!
- Outstanding Teacher and truly cared about the students and their projects!!
- Matt was definitely one of my favorite professors this semester as he made sure to lay everything out in a clear and understandable way. He made sure to go over the basics plus more of each program we utilized in this course with detailed powerpoints. It definitely aided in my understanding of each program, especially as a first time user. Matt's enthusiasm for teaching was also greatly appreciated as he wanted to make sure everyone did well and tried their very best.
- Very good professor and course to take
- I learned a lot in this course. I received the knowledge that I was looking for and I really enjoyed the activities done in the course.
- I had fun and created some pieces I am really proud of! Thank you for a great year :)
- I really loved this course.
- I liked the course, I learned a lot but also could have learned more. My only complaint was that it was not challenging enough but then again I have already takes a few intro to photoshop courses. Overall Matt is a great professor and kind person and it was a generally fun class to be in.
- This course was incredibly enjoyable because of the interesting assignments and care from the instructor
