- Info and examples from presentation slides and in class. Feedback on assignments.
- His teaching skills about code was great with understanding.
- I really appreciate how Professor DiMatteo explains the topic he's teaching in an easy-to-follow manner. He is extremely well-prepared and his powerpoints are super helpful when following along in class. He is accessible outside of class as well and I can tell that he has a curiosity and passion for web design that I think has also rubbed off on me! This class has truly spiked my interest in web design and I wish I wasn't graduating so that I could learn more from him!!! Wonderful professor and although there is a large amount of subject matter, he is able to easily walk us through it and make web design less scary then it initially seems.
- Everything in this course and in the teachings have been valuable to me.
- Overall the slides with all the directions and examples on what this course was about were extremely helpful. I found myself going back to them to refresh my brain if I needed help with any of the assignments we had. The outside resources we were given were also very helpful in further understanding the course.

- Introducing new material in a more basic fashion; Possibly going into less detail of some examples.
- I wish he had forced us to do examples in class in case we had questions. Doing the code would help me deeply.

- I enjoyed Professor Dimatteo's teaching and the course in general does not need any improvements. I do feel that the lessons would drag out a little long sometimes. I think the biggest concern I have is his speaking, it can be monotone sometimes and just not expressive or emotional at all. It seems like he is shy to talk sometimes as his voice would be soft and light, not very loud and attention grabbing. But other than that it was fun.
- I think having work to do during the 4 hour class would be very helpful in better understanding what we are being taught.

- You did a great job at teaching. Unfortunately, I don't think coding is fun to do.
- Just overall had a very nice time taking this class and it made me want to delve deeper into the subject matter! He's a great professor, keep him around forever!
- Overall, Professor Dimatteo was great. It was clear that he is very qualified and knowledgeable for this course. I enjoyed his teachings and lessons. All course material was very organized with links and images. Canvas was organized and prepared already, all assignments were already put on Canvas with descriptions and instructions. This is how I feel a Canvas page should be. All course materials labelled and nicely organized. All Assignments already created and have detailed description and instructions. It was perfect and I loved it. I would definitely take this course again if I could, it was fun and very similar to IMM-130 which helped me in both courses. Thank you Professor Dimatteo. I hope we will cross paths again.
- Having something to do while the professor is teaching so we can follow along and are not just sitting there for the four hours just listening and seeing the professor code the entire time. I think this will be beneficial because then it gives the students the comfort of asking questions if they get stuck while following along in their own computers. Being more interactive the main comment here.
